ABOUT US

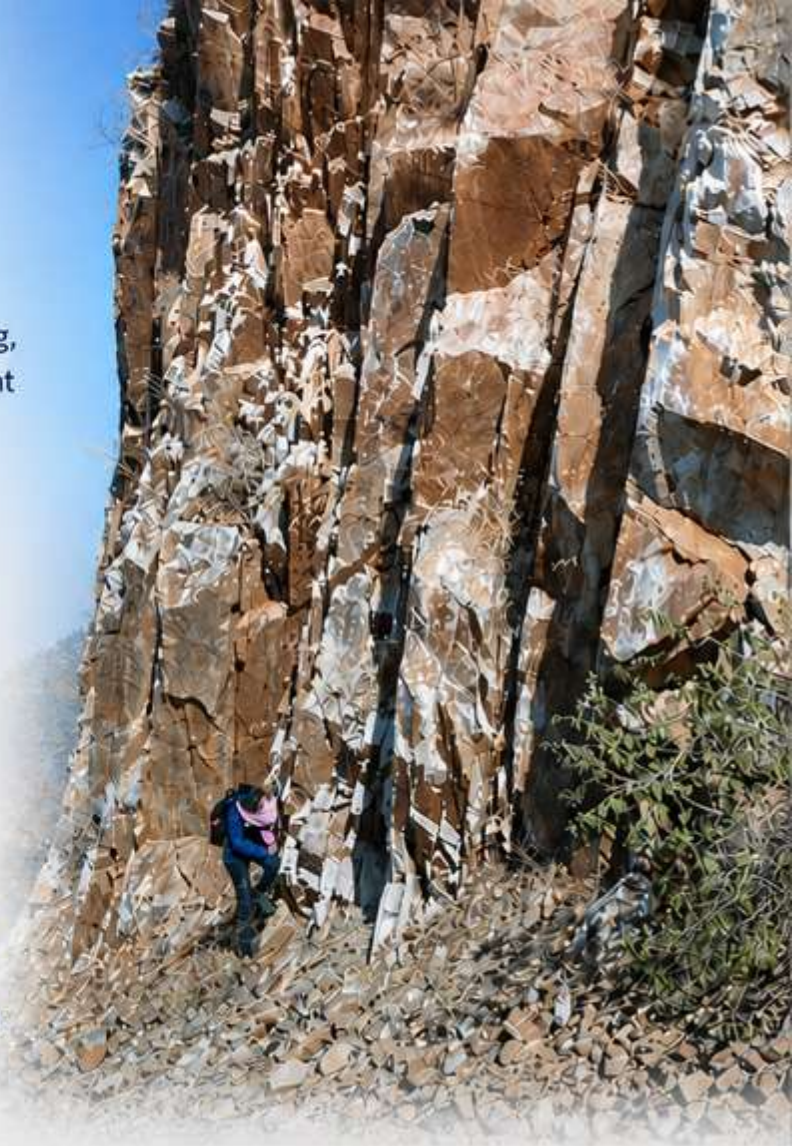

Georidge is an integrated solution for Knowledge Integration, Capacity Building, field excellence, Exploration Management Consultancy (EMC), geospatial and digital solutions.

provide comprehensive geological solutions that unifies academics with advance technology, geo tools solution, field exploration with digital intelligent services (AI, ML & Drones)

A highly competent team of geoscience professionals committed to accuracy, innovation, field-exploration, data-driven solutions and operational excellence

ACADEMIC

Field Training

Hands-on training for students in geology, minerals and exploration techniques.

Field Excursion

Educational field trips to expose real-world geological settings and processes.

Desertation

Support for research projects and dissertation in geology and allied fields.

Books

Wide range of geology and mineral related books for students and professionals.

Software Training

Training on industry-leading geoscience and mining software solutions.

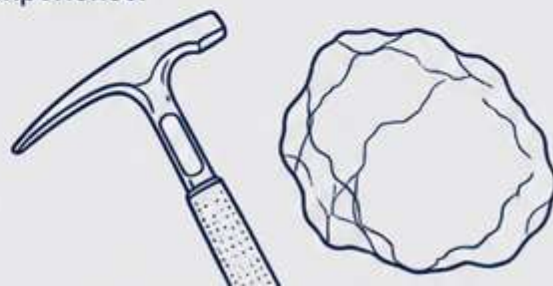

Workshops

Technical workshops and seminars by industry experts.

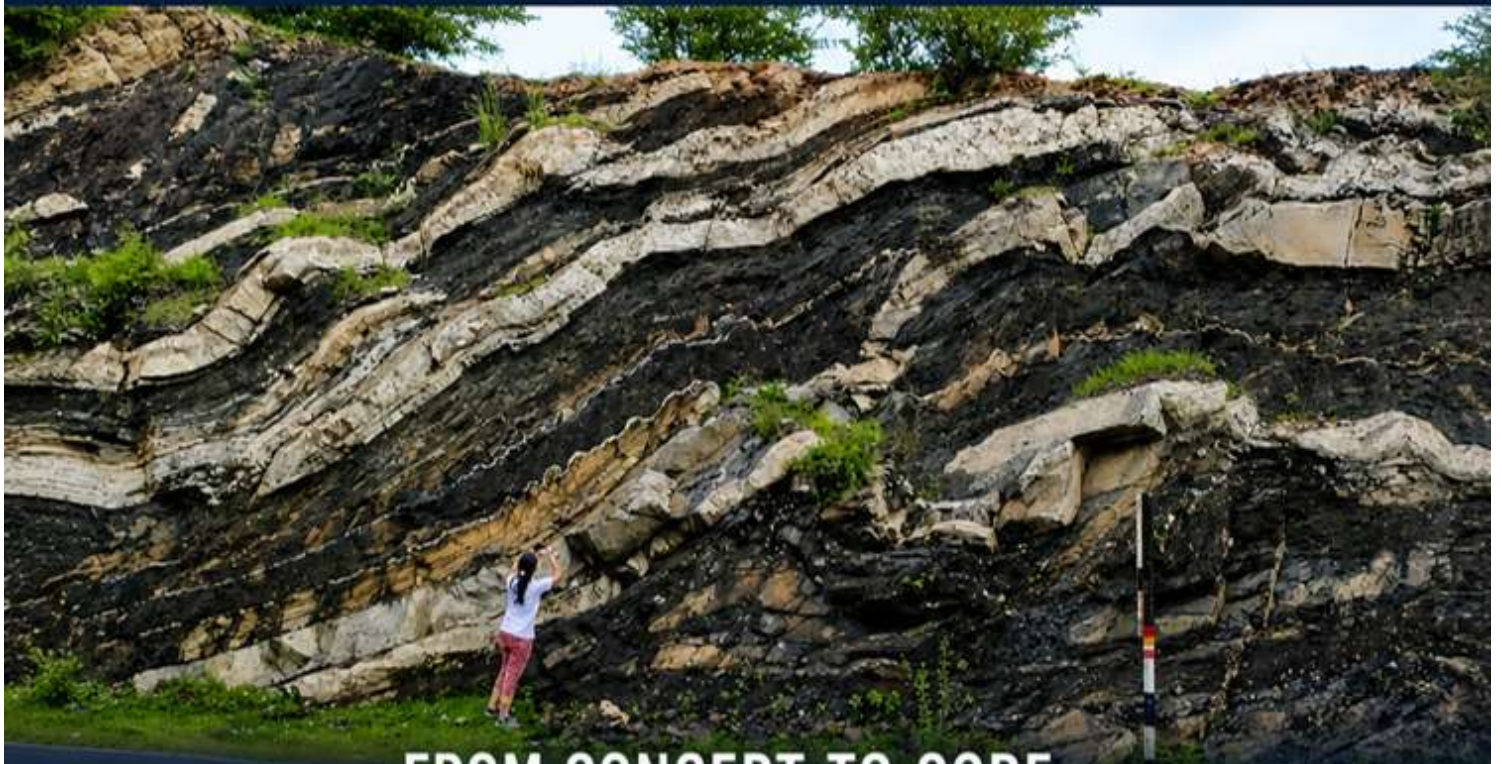

Internships

Internship opportunities to gain practical industry experience.

GEORIDGE

RESEARCH INNOVATION AND DEVELOPMENT PRIVATE LIMITED

**FROM CONCEPT TO CORE—
DELIVERING GEOLOGICAL EXCELLENCE.**

SCAN TO CONNECT

GEOTOOLS

High quality geological tools and equipment for students and professionals.

- ✓ Geological tools for students and professionals
- ✓ Drilling Machines
- ✓ Rock Drilling tools
- ✓ HEMME Equipments

DRILLING OPERATIONS

- ✓ Core drilling (Diamond & RC)
- ✓ Reverse Circulation Drilling
- ✓ Water well drilling
- ✓ Blast hole drilling
- ✓ Drilling for exploration and mining projects

EXPLORATION

Drone Survey, GIS, RS & Digital Intelligence Services

Advanced drone surveying, GIS mapping, remote sensing and digital intelligence for accurate data acquisition and analysis.

Consultancy (EMC)

Expertise in Exploration Management Consultancy (EMC) for efficient planning, execution and value maximization.

VALUE-ADDED SOLUTIONS

GIS & Remote Sensing

Advanced spatial analysis and remote sensing solutions for better decision making.

Data Management

Robust data management and interpretation for accurate geological insights.

Consultancy Services

Expert geological consultancy for exploration, mining and infrastructure projects.
